Subject: NexGen Implementation Plans
Attachments: SAB NexGen briefing draft 042812.pdf; McHale 2012 hp.pdf; Polymorphism and benzene.pdf; NexGen Implementation Work Plan 042812.doc

As promised am attaching a draft work plan for NexGen Implementation. Please provide comments. I will incorporate and finalize. **Please check carefully.**

Im including 2 papers that have nice examples of use of molecular MOA information as part of a discussion of risks. Knowledge maps illustrate some of the data. The benzene papers would be an example of the types of analyses included in an IRIS or ISA type assessments. It should be noted that this is a commitment to analyze the available data and report of this effort. Until the analyses are done, the adequacy and utility of the data will not be clear.

I am also including 1) the SAB briefing pkg (embedded in the slides related to the NexGen Report (slide 31-33 are hotlinks to background articles for the NexGen report if folks want to read more])
and 2) a link to GeneGo's website. GeneGo is the knowledge map program that we will be using and that staff will be

trained on. http://www.genego.com/.
